

Cataract Surgery Pre-Op Information

Location: Pacific EyeCare

20669 Bond Road NE, Suite 100

Poulsbo, WA 98370

Surgery Coordinator (360) 626-5232

Length of Appt: Allow 1 hour.

You are NOT dilated for this appointment.

You will be offered a surgery kit at a cost of \$10. **AND** you will receive your eye drop for surgery at a cost of \$56. Payment for the \$10 surgery kit and the \$56 surgery drop is required at the pre-op appointment.

It is important at this appointment you let the technician know your decision of intraocular lens based on the Dr.'s recommendation from your cataract evaluation.

If you elect a premium IOL or specialty procedure, you will meet with the surgery coordinator. Please be prepared to take care of the financial responsibility at this time.

A technician will do various measurements needed for the Doctor to calculate the power of the IOL (Intra Ocular Lens), which is inserted into your eye once the cataract is removed. Accurate measurements are important for a successful surgical outcome. Contact lenses can temporarily change the shape of the surface of the eye.

You must be out of soft contact lenses 2 weeks prior to pre-op appointment.

You must be out of rigid, gas permeable contact lenses 3 weeks prior to pre-op appointment.

The surgery process will be reviewed and instructions given regarding the surgery eye drops. A printout of the instructions will be given to be reviewed at home.
